

Ufaq Khalid — Portfolio Documentation

Living design & motion notes. Update this file whenever the UI or animations change. PDF export: `public/ufaq-portfolio-documentation.pdf` (run `node scripts/generate-docs-pdf.js`). **Stack:** Next.js App Router · Tailwind · GSAP + ScrollTrigger · Framer Motion · R3F/Three (hero) **Fonts:** Fraunces (display / headings) · Manrope (body) **Theme:** glass-dark · accents teal / violet / amber ---

Each following page = one site area. Animations & hovers at the bottom of that page.

Global (all pages)

- Floating pill **Navbar** (same on home + project pages)
 - **Theme toggle** (fixed top-right): dark != light; preference saved in `localStorage`
 - **Cursor image trail** (desktop, reduced-motion off)
 - **Scroll progress** circle (bottom-right, ring scrubbed to page scroll)
 - **GsapRefresh** after fonts/images
 - **ScrollToHash** on home for `/#section` from inner pages
 - Reduced motion: final states, no fancy motion
-

Animations & hover effects

(global)

- Theme toggle: soft lift + teal glow; sun/moon icon swap
 - Light theme: soft white + lilac + pink + yellow fixed gradient background; navy (`#13294b`) body/nav text; section ornaments unchanged
 - Nav shrink-on-scroll (padding / blur / border)
 - Logo U: conic ring spin, breath glow, hover scale
 - Active nav: teal dot + theme-aware text (scroll-spy / probe line)
 - Contact Me / soft CTAs: lilac!pink gradient fill, deep purple text; lift + pink/violet glow on hover
 - Hamburger: 3-line != X
 - Back-to-top: fade in + SVG progress ring scrub
 - Cursor trail: fading image stamps follow pointer
-

Page: Home — Navbar

Floating pill, max-width 800px. Links: `/#home` ... `/#faq`, Contact !' `/#contact`. Logo !' `/#home`.

Animations & hover effects

- Logo: radial fill, rotating conic gradient ring, box-shadow breath, hover scale 1.06 + faster ring
- Links: color transition (white in dark / navy in light); active teal dot scale/opacity
- Contact Me (`btn-contact-glow`): lilac!pink gradient, deep purple text; lift + pink/violet glow
- Mobile menu: expand panel; hamburger morph

Page: Home — Hero (`#home`)

Status pill · Fraunces name · italic Manrope/Fraunces subline · body copy · two CTAs · meta row · 3D IT scene (or green sphere fallback).

Animations & hover effects

- Status pill: green pulse dot (`heroPulse`)
- Entrance: pill fade/rise !' split-text word mask (yPercent) !' subline/para/CTAs/meta stagger
- CTAs: `btn-neon` outline teal glow hover; `btn-soft` lilac/pink gradient lift/glow
- Scroll cue: bobbing !"
- 3D: orbits, float, sway, pointer parallax, scroll scrub (drift/tilt/scale); typing code texture
- Fallback sphere: slow float + mouse parallax
- Reduced motion / no WebGL: static / sphere fallback

Page: Home — How I build (`#about`)

Sticky left editorial + numbered process list (01–04). No cards. Curved section ornament.

Animations & hover effects

- Section ornament: stroke-dash draw + end glow dot
- Desktop: ScrollTrigger active step (opacity 1 / 0.3, teal numeral, title x:16!0)
- Dot rail: active fill + glow; click scrolls to step
- Mobile: stacked reveal y/opacity only
- Last step: extra bottom padding so 04 can activate

Page: Home — My Skills (`#skills`)

Equal-width white-glass cards, readable scatter (straight !' up-right !' up-left !' up-right).

Animations & hover effects

- GSAP stagger reveal on wrappers
- Hover: lift, straighten rotate, bring to front; siblings dim
- Framer spring for pose / hover

Page: Home — My Services (`#services`)

Accordion list with left icons, tags, preview image.

Animations & hover effects

- GSAP stagger reveal on rows
- Toggle: chevron rotate 180°; open circle teal ring + glow
- Panel: grid-rows height ease; content fade/rise; image scale 0.96!`1

Page: Home — Selected projects (`#work`)

Three tilt cards (DBMS, DSA, SE) !' `/projects/[slug]`.

Animations & hover effects

- GSAP stagger reveal on card wrappers
- Hover: ****rotateX 70° backward only**** (top tips away); spring flat on leave
- Media zoom on hover; rim / shadow deepen
- No behind-card stain / fake depth slab
- No center scan line
- Desktop fine-pointer only; reduced motion = flat

Page: Home — What people say (`#testimonials`)

Horizontal drag/swipe cards.

Animations & hover effects

- Enter: sequential pop (scale/y/opacity, `back.out`, stagger)
- Then faster sine float (yoyo); pause on hover/drag
- Card hover: slight lift + teal border glow
- Overflow-x clip on section

Page: Home — Quick answers (`#faq`)

Numbered accordion (01–05).

Animations & hover effects

- GSAP stagger reveal on items
- Open: expand answer (Framer height/opacity); badge teal; chevron rotates 180°
- Left accent bar / gradient rail

Page: Home — Contact (`#contact`)

Copy + phone/email/WhatsApp · glass form !' WhatsApp submit.

Animations & hover effects

- Section heading: split-text + ornament (amber)
- Form fields: GSAP stagger y/opacity
- Links: amber accent hover underline
- Submit: `btn-whatsapp` glow/hover

Page: Home — Footer

CTA band · brand + status pill · PKT time · Navigate / Contact / Social · wordmark.

Animations & hover effects

- Columns: GSAP stagger reveal
 - Wordmark: theme-aware watermark (visible navy tint in light / soft white in dark); rise in + pointer-follow green glow (quickTo`)
 - Nav links: `/#...` so they work from project pages; arrow slide-in + x shift
 - Social icon buttons: border glow on hover
 - Copy email: temporary “Copied ”
 - Soft top gradient (no hard rule)
 - Same Footer on home + project case studies (root layout)
-

Page: Project case study (`/projects/[slug]`)

Overview image · Problem / Approach / Result / Stack · links. Sticky “On this page” TOC.
No “!• Back to work” — use navbar (`/#...`).

Animations & hover effects

- Same global navbar / trail / back-to-top
- TOC links: color hover
- CTAs: `btn-neon` / `btn-soft` same as hero
- Work stays active in scroll-spy on this route

Shared section headings

Used on Skills, Services, Work, Testimonials, FAQ, Contact (and ornament on About).

Animations & hover effects

- Eyebrow fade/rise
- Title: SplitText words masked yPercent reveal
- Optional subtitle fade
- `SectionOrnament`: path draw + glowing end dot
- `toggleActions: play none none reverse`
